Please help us!

The NCSU Solar Center wants to estimate the Center’s economic impact on the state, beginning with fiscal year 2002. Please help us by answering the following three questions and returning this message to us as quickly as possible. Thank you!

1. What is your profession?

2. Have you implemented or do you plan to implement any of the technologies discussed in the workshop(s) you attended? If so, please choose from among the following options and list total size or capacity of the system installed or estimate energy savings:

   - passive solar design, _________ % energy savings (estimate)
   - solar space heating, _________ square feet of collector panels
   - solar pool heating, _________ square feet of collector panels
   - daylighting, _________ square feet of skylights or solar tubes
   - photovoltaics, _________ kW(dc) system rating
   - solar water heating, _________ square feet of collector panels
   - energy-efficient design, _________ % energy savings (estimate)
   - other, _________ % energy savings (estimate)

3. Size of home or building where renewable energy or energy efficiency measures will be implemented? _________ square feet
