Good day, gentlemen:

You are the first people in the Facilities Engineering Management Program to receive an electronic survey from North Carolina State University. Since this is new, it is as much an experiment as it is an attempt to gather useful comments about the Facilities Engineering Management Program. Please take a couple of minutes to answer the survey questions, particularly the last question about this email survey. If you will hit “reply” on your email toolbar, you should be able to type the answers into the survey form and send them to me with no difficulty. Obviously, if you do have problems I would really like to know what they are. Below is the entire text that I intend to use for the survey. I would welcome comments about any part of the survey. Thank you in advance.

Best regards,
Wayne

As a recent participant in the Facilities Engineering Management Diploma Program we value your opinion of the program and solicit your comments on changes that you believe would be improvements for future sessions. Please take a couple of minutes to provide us some general feedback on the program. Thank you.

SURVEY

What is your impression of the Facility Engineering Management program offered by the Office of Professional Development at North Carolina State University? What recommendations can you make for changes to the program?

COMMENTS:

What changes have you made in your work habits or work procedures since you returned to work? What career benefits do you believe were gained by completing the FEM courses?

COMMENTS:

What impact on your job performance can be related to the courses in the FEM program?

COMMENTS:
What financial benefits have been realized by your organization from using knowledge gained in the FEM program?

COMMENTS:

Would you recommend to your management that your organization continue this type of training for your maintenance staff?

COMMENTS:

Do you think that an email survey is a good idea? Why or why not?
